SUMMARY

Collection strategy and credit risk professional with 7+ years in unsecured consumer credit, covering credit cards, point of sale and consumer durable finance, and micro lending. Experience spans an Indian bank, an NBFC and a fintech lender. Currently responsible for treatment strategy design, digital campaign testing and performance reporting on a credit card book in the DPD 30-150 range, working alongside Collections Operations, Finance, Risk and Data Science. Writes SQL to pull and analyse portfolio data. Results to date include collection efficiency up 15 points, forward roll rates down 15% and DSO cut by 12 days. MBA in Finance, with people management and vendor management experience across in-house teams and external agencies.

CORE COMPETENCIES

Strategy: Collection Strategy | Treatment Program Design | Champion-Challenger Testing | Test and Learn | Digital Collection Campaigns | Portfolio Segmentation | Risk and Reward Optimisation | Cost of Collections

Credit Risk: Credit Risk Management | Delinquency Management | Roll Rate Analysis | Gross and Net Slippage | Ageing Analysis | Credit Appraisal and Underwriting | Recovery and Normalisation | Consumer Loans | Banking and NBFC

Metrics: Collection Efficiency (CE%) | Collections Effectiveness Index (CEI) | Account Collection Ratio (ACR) | Days Sales Outstanding (DSO) | Resolution and Rollback Rates | Month on Month Analysis

Tools: SQL (hands-on query writing for data extraction and analysis) | Advanced Excel (Power Query, Pivot Tables, Index-Match, Dashboards) | Power BI | Python for Analysis | CRM Platforms (One Accord) | MIS and Reporting

Stakeholder: Vendor and Agency Management | Cross-functional Partnering with Operations, Finance, Risk, Legal and Data Science | Senior Management Reporting | Team Leadership

PROFESSIONAL EXPERIENCE

FPL TECHNOLOGIES (ONECARD), Pune

Manager, Business and Collection Strategy June 2026 to Present

- Build and maintain collection treatment strategies for the credit card book, segmenting accounts by risk profile, payment behaviour and recovery likelihood so that treatment effort and channel cost match what each segment is worth recovering.
- Design digital collection campaigns and run parallel **champion-challenger tests** on channel mix, contact timing and messaging, then roll the winning version into standing treatment logic.
- Set performance thresholds for each strategy, review how the strategy suite is performing against them, and recommend changes where programs fall short.
- Write SQL queries against the collections database to build performance views, size opportunities and check test results independently of standard MIS.
- Prepare monthly performance packs for senior management covering how each treatment program is tracking, what is in the pipeline and where results have missed plan.
- Work with Collections Operations and Data Science to close gaps in data capture and account tagging so that program results can be measured accurately.
- Led the shift from Excel-based data handling to **One Accord**, a CRM-based operating model now used across collections, legal, and quality and assurance. Defined allocation logic, workflow design and reporting requirements, ran UAT and handled onboarding for internal users and agencies.
- Migration outcome: reduced the number of collection agencies needed and moved a larger share of the portfolio onto digital channels, which brought down the cost of collections. All users and agencies across the organisation are now on One Accord, improving data security and productivity.

Manager, Repayments June 2023 to May 2026

- Handled the credit card receivables book across DPD 30-150, owning collection, recovery and delinquency targets.
- Ran roll rate analysis on forward and backward flows to track credit risk movement between delinquency buckets and act on adverse trends.
- Measured and controlled gross and net slippage, tracking fresh flow into delinquency to contain portfolio deterioration.
- Tracked and improved CE%, CEI and ACR across allocated portfolio segments.
- Built field allocation and follow-up logic based on risk segmentation and recovery probability.
- Drove resolution, rollback and normalisation to reduce overdue receivables, improve cash flow and bring down DSO.

- Managed field, tele-calling and tracing agencies on productivity and process compliance, and handled disputes, skip cases and deceased accounts.

Key Achievements

- Improved collection efficiency from 50% to 65%, a gain of 15 points, within 6 months.
- Brought forward roll rates down by 15%, limiting delinquency escalation.
- Reduced net slippage by 1.5%, improving portfolio quality.
- Cut DSO by 12 days through changes to the collection cycle.
- Raised normalisation and rollback rates by 7%, reducing higher bucket exposure.

HDFC BANK, Pune

Retail Portfolio Management, Collections, Consumer Durables (Point of Sale Credit) Sept 2020 to June 2023

- Ran collections for a consumer durable and point of sale credit portfolio across the **Pune and Nashik territories**, working through 7 to 8 field, tele-calling and tracing agencies alongside an in-house collections team.
- Carried out ageing, roll rate and slippage analysis to monitor portfolio health and direct recovery effort.
- Designed and reviewed field follow-up logic for the portfolio against resolution, rollback and normalisation targets.
- Reduced the portfolio opening balance through rollback and normalisation, controlling inventory.
- Set productivity benchmarks for agencies covering resolutions, rollbacks, recoveries and ACR, and ran periodic vendor reviews on effectiveness, manpower and process adherence.
- Handled disputes and expired accounts to prevent escalations, referring sensitive cases to senior management.
- Held team members to budgeted ACR while following the Preferred Process across defined portfolio segments.

BANDHAN BANK, Indore

Area Manager July 2019 to July 2020

- Appraised, sanctioned and disbursed micro lending and SME credit against borrower eligibility and repayment capacity, including financial assessment of applicants from the informal sector. Covered the **full credit lifecycle from origination through to delinquency management**.
- Set up a support function aligned to product requirements across appraisal, documentation, disbursement, repayment and delinquency management.
- Accountable for business growth in micro lending and SME segments within the assigned area.
- Produced weekly, monthly and quarterly MIS for senior management and prepared monthly review presentations.
- Trained and supervised branch staff on standard operating procedures, and kept collections on track across branches within deadline.

EDUCATION

Master of Business Administration, Finance | International Institute of Professional Studies, DAVV, Indore | 2019

Bachelor of Business Administration, Finance and Marketing | Shri RGP Gujrati Professional Institute, DAVV, Indore | 2017
